

JULY 2024

The Northern Berkshire Astronomical Society

Meets the first Wednesday of every month, at the
North Adams Public Library at 6 PM.

74 Church St. North Adams MA

Summer Spectacle

With galaxies over in the West, we now start to see the Summer constellations and the Milky Way rising in the East. Hercules is almost overhead.

Constellations

AND - Andromeda - *the Chained Maiden*
 AQL - Aquila - *the Eagle*
 BOO - Boötes - *the Herdsman*
 CAM - Camelopardalis - *the Giraffe*
 CAP - Capricornus - *the Goat*
 CAS - Cassiopeia - *the Queen of Ethiopia*
 CEN - Centaurus - *the Centaur*
 CEP - Cepheus - *the King of Ethiopia*
 COM - Coma Berenices - *Berenice's Hair*
 CRA - Corona Australis - *the Southern Crown*
 CRB - Corona Borealis - *the Northern Crown*
 CRT - Crater - *the Cup*
 CRV - Corvus - *the Crow*
 CVN - Canes Venatici - *the Hunting Dogs*
 CYG - Cygnus - *the Swan*
 DEL - Delphinus - *the Dolphin*
 DRA - Draco - *the Dragon*
 EQU - Equuleus - *the Little Horse*
 GEM - Gemini - *the Twins*
 HER - Hercules - *Hercules*
 LAC - Lacerta - *the Lizard*
 LEO - Leo - *the Lion*
 LIB - Libra - *the Scales*
 LMI - Leo Minor - *the Little Lion*
 LUP - Lupus - *the Wolf*
 LYN - Lynx - *the Lynx*
 LYR - *the Harp*
 MIC - Microscopium - *the Microscope*
 OPH - Ophiuchus - *the Serpent Bearer*
 PEG - Pegasus - *the Winged Horse*
 PER - Perseus - *the Hero*
 SCO - Scorpius - *the Scorpion*
 SCT - Scutum - *the Shield*
 SER - Serpens - *the Serpent*
 SGE - Sagitta - *the Arrow*
 SGR - Sagittarius - *the Archer*
 TRI - Triangulum - *the Triangle*
 UMA - Ursa Major - *the Great Bear*
 UMI - Ursa Minor - *the Lesser Bear*
 VIR - Virgo - *the Maiden*
 VUL - Vulpecula - *the Little Fox*

How to Use the Chart

South is at the bottom, if you hold the chart “up” against the sky, facing South, then East will be to your left and West to the right. (Or if you hold the map upside-down and face North, East will be to the right, West to the left.)

On the chart, the orange dashed line shows the celestial Equator; the green dashed-dotted line the Ecliptic. The Milky Way is outlined with a blue dotted line.

Date	Time
Jul 1	11:00 PM (EDT)
Jul 8	10:30 PM
Jul 15	10:00 PM
Jul 22	9:30 PM
Jul 29	9:00 PM

Because of the Earth's motion around the Sun, the time for this chart changes slowly over time, roughly 1/2 hour earlier every week:

Planets

We have no evening planets for a few more months.

Mercury and Venus set just after the Sun. It might be possible (with some luck) to capture Mercury in the twilight glow crossing from Gemini through Cancer towards Regulus.

In the early morning however: all of the outer planets are present with Saturn and Neptune rising around 11-11:30 PM (mid-month) in Aquarius and Pisces, respectively. Later - Mars, Jupiter, and Uranus arrive, all in Taurus rising between 1:30-2:30 AM (mid-month). These times will get earlier by about 30m each week.
