

JANUARY 2025

The Northern Berkshire Astronomical Society

Meets the first Wednesday of every month, at the
North Adams Public Library at 6 PM.

74 Church St. North Adams MA

Happy New Year

2025 starts with almost every planet in the evening sky (except for Mercury - we'll see that in March), a Lunar Eclipse (also in March) and the Winter Constellations on display!

Constellations

AND - Andromeda - *the Chained Maiden*
 AQR - Aquarius - *the Water Bearer*
 ARI - Aries - *the Ram*
 AUR - Auriga - *the Charioteer*
 CAM - Camelopardalis - *the Giraffe*
 CAS - Cassiopeia - *the Queen of Ethiopia*
 CEP - Cepheus - *the King of Ethiopia*
 CET - Cetus - *the Whale*
 CMA - Canis Major - *the Greater Dog*
 CMI - Canis Minor - *the Lesser Dog*
 CNC - Cancer - *the Crab*
 COL - Columba - *the Dove*
 COM - Coma Berenices - *Berenice's Hair*
 CVN - Canes Venatici - *the Hunting Dogs*
 CYG - Cygnus - *the Swan*
 DEL - Delphinus - *the Dolphin*
 DRA - Draco - *the Dragon*
 ERI - Eridanus - *the River*
 FOR - Fornax - *the Furnace*
 GEM - Gemini - *the Twins*
 LAC - Lacerta - *the Lizard*
 LEO - Leo - *the Lion*
 LEP - Lepus - *the Hare*
 LMI - Leo Minor - *the Lesser Lion*
 LYN - Lynx - *the Lynx*
 LYR - Lyra - *the Harp*
 MON - Monoceros - *the Unicorn*
 ORI - Orion - *the Hunter*
 PEG - Pegasus - *the Winged Horse*
 PER - Perseus - *the Hero*
 PHE - Phoenix - *the Phoenix*
 PSC - Pisces - *the Fish*
 PUP - Puppis - *the Stern (of Argo)*
 SCL - Sculptor - *the Sculptor's Workshop*
 TAU - Taurus - *the Bull*
 TRI - Triangulum - *the Triangle*
 UMA - Ursa Major - *the Great Bear*
 UMI - Ursa Minor - *the Lesser Bear*
 VUL - Vulpecula - *the Little Fox*

How to Use the Chart

South is at the bottom, if you hold the chart “up” against the sky, facing South, then East will be to your left and West to the right. (Or if you hold the map upside-down and face North, East will be to the right, West to the left.)

On the chart, the orange dashed line shows the celestial Equator; the green dashed-dotted line the Ecliptic. The Milky Way is outlined with a blue dotted line.

Date	Time
Jan 1	9:00 PM (EST)
Jan 8	8:30 PM
Jan 15	8:00 PM
Jan 22	7:30 PM
Jan 29	7:00 PM

Because of the Earth's motion around the Sun, the time for this chart changes slowly over time, roughly 1/2 hour earlier every week:

Planets

Venus is in Aquarius, easily visible after sunset.

Saturn low in the SW sky at Sunset - near Venus.

Jupiter in Taurus - nearly overhead in the early evening.

Mars in Gemini close to the stars Castor and Pollux

Uranus in binoculars or a small telescope SW of the Pleiades in Taurus.

Neptune are findable in a small telescope (and a finder chart) below the circlet of Pisces.

This is the last chance to see 6 planets in the evening sky!
