How to Use the Chart

South is at the bottom, if you hold the chart “up” against the sky, facing South, then East will be to your left and West to the right. (Or if you hold the map upside-down and face North, East will be to the right, West to the left.)

On the chart, the orange dashed line shows the celestial Equator; the green dashed-dotted line the Ecliptic. The Milky Way is outlined with a blue dotted line.

Date	Time
Jul 1	11:30 PM (EDT)
Jul 8	11:00 PM
Jul 15	10:30 PM
Jul 22	10:00 PM
Jul 29	9:30 PM

Because of the Earth’s motion around the Sun, the time for this chart changes slowly over time, roughly 1/2 hour earlier every week:

Planets

Mercury is in Cancer, setting just after the Sun in early July

Venus is in Taurus, visible just before sunrise

Mars in Leo low in the W after sunset

Saturn is in Pisces, rising at midnight

Uranus is in Taurus, near the Pleiades

Neptune is also in Pisces, rising minutes before Saturn.
