

SEPTEMBER 2025

The Northern Berkshire Astronomical Society

Meets the first Wednesday of every month, at the
North Adams Public Library at 6 PM.

74 Church St. North Adams MA

Two Grand Galaxies

While Saturn dominates the SE sky, the Andromeda (M 31) and Triangulum (M 33) galaxies are rising in the East, visible in dark skies with the naked eye, binoculars, and telescopes!

How to Use the Chart

South is at the bottom, if you hold the chart “up” against the sky, facing South, then East will be to your left and West to the right. (Or if you hold the map upside-down and face North, East will be to the right, West to the left.)

On the chart, the orange dashed line shows the celestial Equator; the green dashed-dotted line the Ecliptic. The Milky Way is outlined with a blue dotted line.

Date	Time
Oct 1	9:30 PM (EDT)
Oct 8	9:00 PM
Oct 15	8:30 PM
Oct 22	8:00 PM
Oct 29	7:30 PM

Because of the Earth's motion around the Sun, the time for this chart changes slowly over time, roughly 1/2 hour earlier every week:

Planets

Venus is in Virgo, visible, 90 minutes before sunrise

Mars is in Libra, setting just after the Sun

Jupiter is in Gemini, rising ~11:30 PM

Saturn is in Pisces, observable almost all night

Uranus is in Taurus, near the Pleiades

Neptune is in Pisces, rising minutes after Saturn.
